

Matte, Gloss or **BOTH**

MIXED
Matte and Gloss

ARC brings the latest FLXFinish⁺ Technology to take your visual communications to the next level

**Differentiate Your Designs
and Stand Out from the
Competition with FLXFinish⁺**

Captivate your customers by drawing the eye to your most compelling graphics and text.

Imagine the possibilities

All New Specialty Output and Finish Bring Graphics to Life

FLXFinish+ has an ingenious curing strategy that results in two distinct finishes: shiny gloss, matte or both. The gloss/matte feature provides a unique output solution to highlight and emphasize text and imagery and will differentiate your graphics from your competition.

Premium items like wall graphics look more luxurious with a lovely deep matte finish. Photos reveal their true color depth and impact with smooth, mirror-like gloss.

ARC can create a large variety of eye-catching, innovative graphics with fast turnaround at competitive prices. We understand you require brilliant visuals and with the FLXFinish+ application, ARC can deliver!

Many Applications

- Wall coverings
- Posters
- Banners
- Packaging
- Vehicle wraps
- Floor graphics
- Wallpaper

Benefits

- Reduced glare
- Eye-catching contrast
- Highly custom
- Good for the environment
- Quick turn-time
- Cost-effective

Sustainability

Certified printing with less ink consumption is better for the environment. With UVgel technology, products meet strict chemical emission limits and contribute to healthier interiors such as hospitals, schools and other public places as evidenced by the UL GreenGuard Gold Certification.
